

# BountiGel® G

## PRODUCT USAGE GUIDE

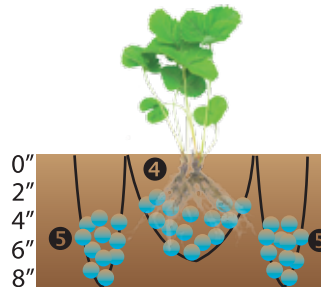

### Application: Granular product using Gandy-type boxes

- **At listing or pre-plant:** Shank/knife-in granular product. ❶
- **Post-planting:** Side dress granular product post-planting. ❷

### Product Uses:

- **For improved seed germination:** Apply granular product at seed depth in seed line. ❸
- **For improved transplant survival and uniform establishment:** Shank/knife-in granular product pre-transplant, OR post-transplant close to transplant line at root zone and at 3-6" depth. ❹
- **For improved seasonal crop growth:** Apply granular product in or close to plant line at root zone and at 4-8" depth. ❺

### Rates:

- **Apply** one 22-lb bag of BountiGel G (granular size 1-2mm) per treated acre.

22-lbs  
**G** = 1 ac.
